Task 1

Write a program which reads three natural numbers, **a**, **b** and **c**, and then prints "OK" if any two of them are equal, but the third is different, and "NOT OK" otherwise.

Deadline: Oct 23 (inclusive)

Put your Java file(s), and only Java files, in a directory the name of which is your surname (without Polish or any other non-ASCII characters). Names of Java files are arbitrary, although of course they should correspond to names of classes you created. Zip the whole directory ("from above" — not just the files inside it). Then drop the zip file created in this way into folder "Foldery zadań / Task_XX" of the EDUX system (where 'XX' is the task number).
